

## Complete A git merge request

Uploading to Github

Create repository in Github

```
echo "# class7-hm" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/DennistonShaw/class7-hm.git
git push -u origin main
```

To unstage as file, if one doesn't work use the other  
git restore --staged .DS\_Store      or      git reset .DS\_Store

to the parent folder of the file I want to commit  
If the Git has already been created start at  
Git add  
Then git add status \*write a message of what you are adding or changing

### How to delete a GitHub file using terminal without erasing it on my local computer

```
git rm -r --cached filename (if it is a directory *not the recursive)
git rm --cached filename (if its just the file)
git commit -m "note of what I did"
```

creating a new branch // commit and push

from within the folder containing the git repo do  
git branch "branch-name"                      creates branch  
git checkout branch-name                      to look at the new branch  
git checkout main                              go back to the main

when you create a branch it is based on the main branch you created it from and will inherit the code for that main so make sure when you create a branch you are on the branch you want to create the new branch on or use      git branch new-branch-name source-branch

git checkout name of the branch  
git add the new file                      or you are just updating the files already there so coming  
git commit -m "describe what I'm doing"  
git push --set-upstream origin **name of the branch**

Complete a git merge request, with screenshots of the request and updated content

1. Under your repository name, click pull requests

## 2. Compare and pull request. In the list click and pull request you'd like to merge

The screenshot shows the 'Compare changes' interface on GitHub. At the top, the repository name 'DennistonShaw / class7-hm' is visible. Below the navigation bar, the 'Compare changes' section is active. It features a dropdown menu with 'base: main' and 'compare: main'. A message states: 'Choose different branches or forks above to discuss and review changes. [Learn about pull requests](#)'. A green button labeled 'Create pull request' is on the right. Below this, a section titled 'Compare and review just about anything' explains that branches, tags, commit ranges, and time ranges can be compared. A table of 'Example comparisons' is shown:

Example comparisons	
<a href="#">merge-branch-hw</a>	2 hours ago
<a href="#">main@1day)...main</a>	24 hours ago

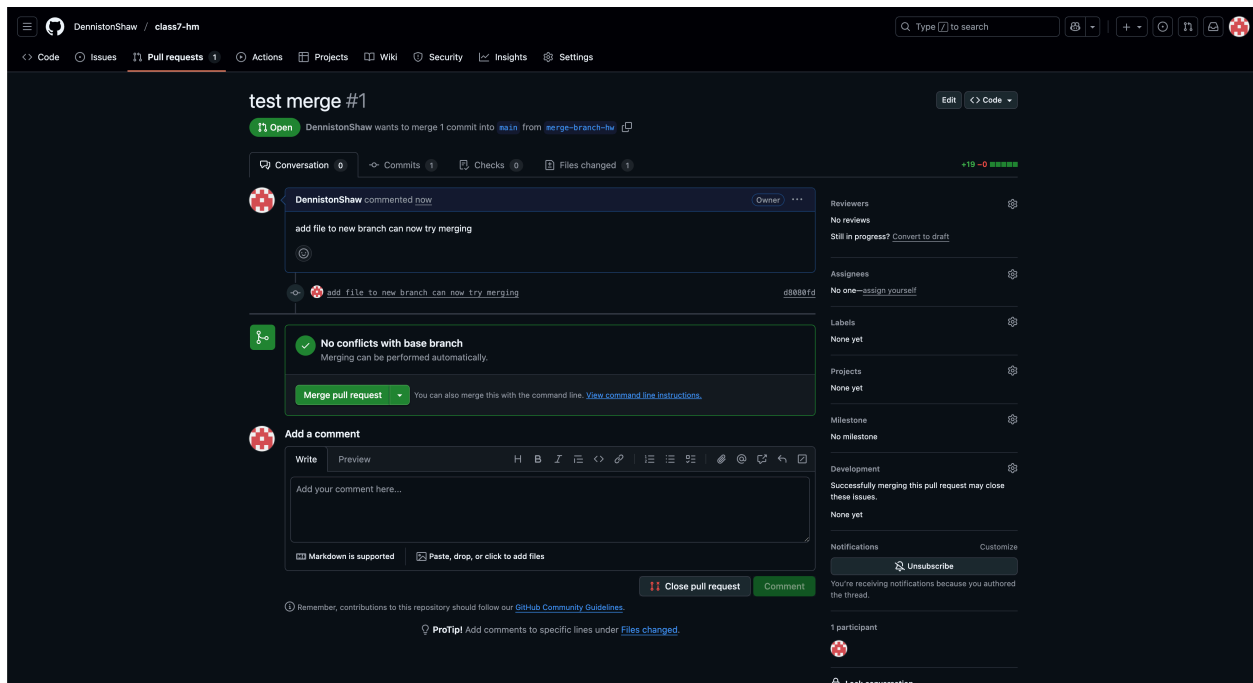

The screenshot shows the 'Open a pull request' interface. At the top, it says 'Create a new pull request by comparing changes across two branches. If you need to, you can also [compare across forks](#). [Learn more about diff comparisons here](#).' Below this, the 'base: main' and 'compare: merge-branch-hw' dropdowns are shown, with a green checkmark and the text 'Able to merge. These branches can be automatically merged.' The main section is titled 'Add a title' and 'Add a description'. The title field contains 'test merge'. The description field contains 'add file to new branch can now try merging'. To the right, there are settings for 'Reviewers' (No reviews), 'Assignees' (No one—assign yourself), 'Labels' (None yet), 'Projects' (None yet), and 'Milestone' (No milestone). A green button labeled 'Create pull request' is at the bottom. Below the form, a summary bar shows '1 commit', '1 file changed', and '1 contributor'. The 'Commits on Oct 8, 2025' section shows a commit by 'DennistonShaw' with the message 'add file to new branch can now try merging'. Below this, a diff view shows the changes in 'wk3-hw--deliverables.txt'.

Remember, contributions to this repository should follow our [GitHub Community Guidelines](#).

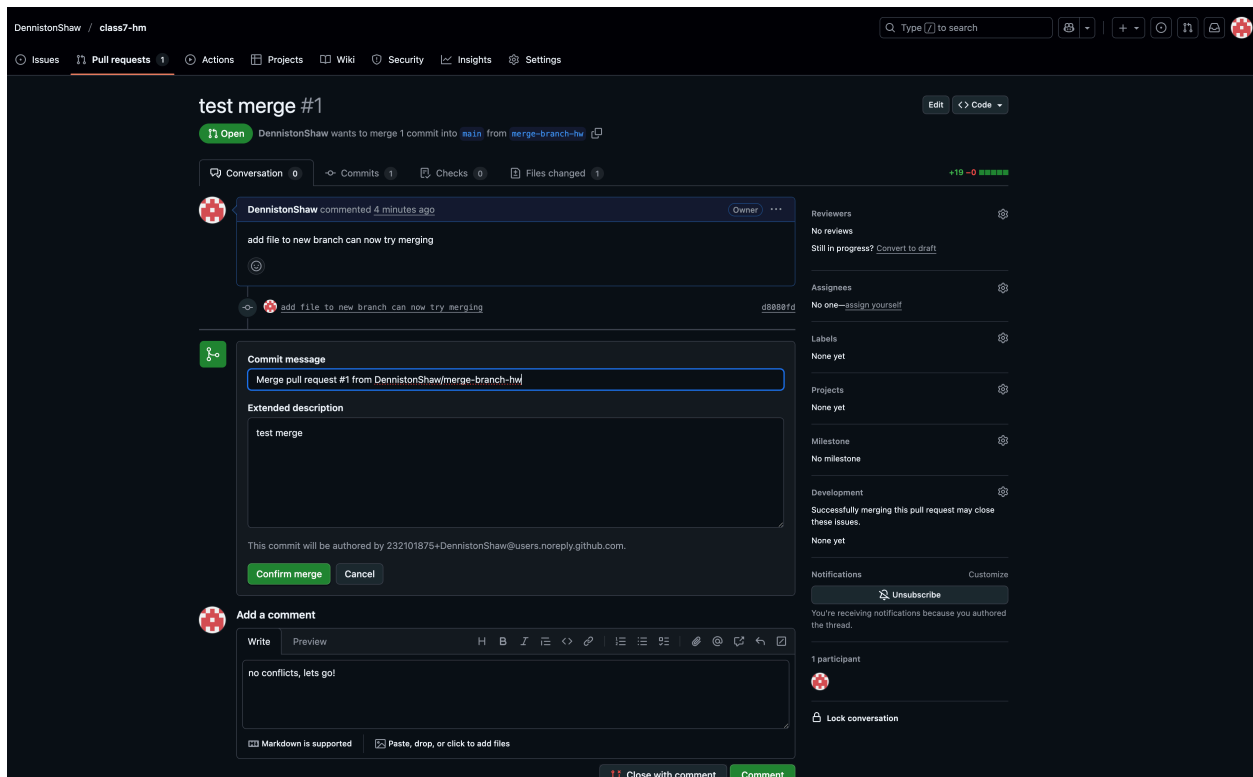

Showing 1 changed file with 19 additions and 0 deletions.

```
19 wk3-hw--deliverables.txt
@@ -0,0 +1,19 @@
1 + WEEK 3 HW ASSIGNMENTS
2 +
3 + HW - DELIVERABLES (5 pts)
4 + Must be in github repo link (can be a single repo link or multiple repo links)
5 + Include Week 1 HW
6 + Include Week 2 lab notes
```

### 3. create pull request

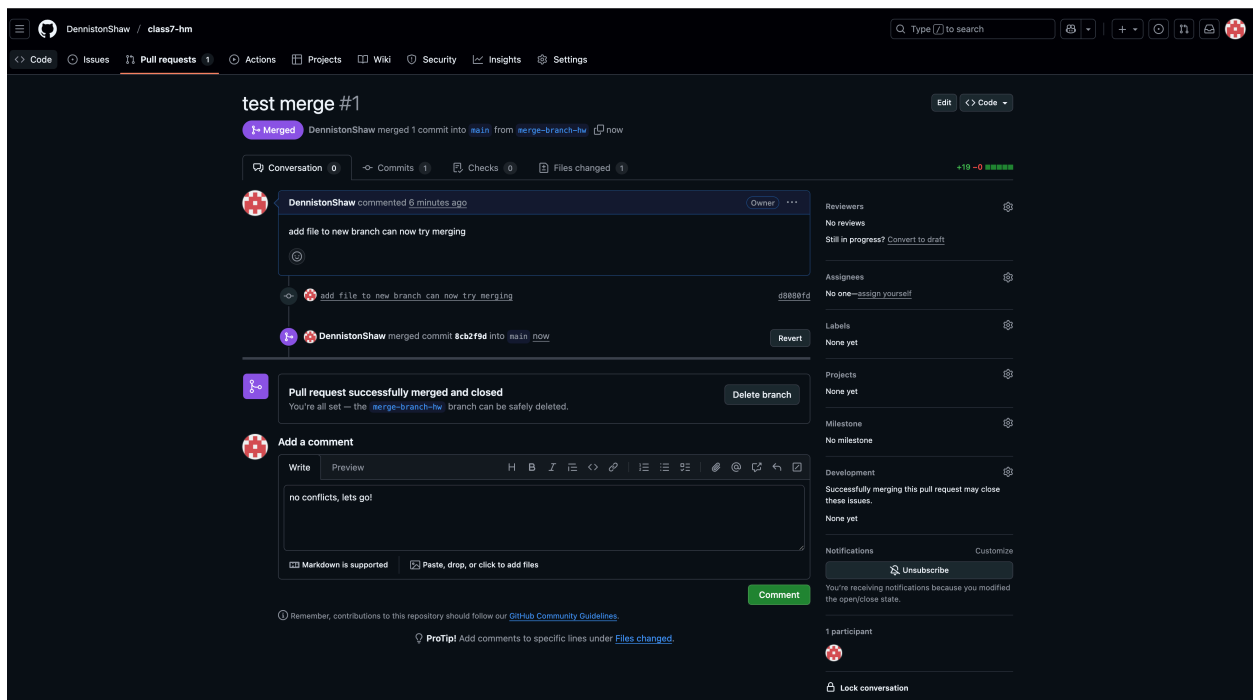

### 4. if prompted, type a commit message, or accept the default message. No conflicts, lets go! Merge pull request

## 5. Confirm merge

Pull request successfully merged and closed. You can delete branch here,

## 5. Now only main remains is there and the changes are there. Success!
